Be not deceived. The timid damsel who shivers and clings to your arm during the fireworks display may positively refuse to consider you as a protector later on.

An advertisement of the quartermaster's department of the army asks for proposals to furnish seven thousand five hundred pairs of trousers. Not "pants." Lawabiding citizens will take notice.

Abdul Hamid, who lives in abject fear of assassination, insisted on being told that the king of Servia died through an unfortunate accident. It would be a joke to kidnap the timid Sultan and make him spend a Fourth of July over here.

Count Boni de Castellane has been elected a member of the French chamber of deputies again. It seems necessary for Boni to get elected about every six weeks. No wonder the task before him, and it is gratifying to Goulds have to put up lots of money for his campaign expenses.

Through the movement toward the democracy of studies and constructive individualism a new ideal is being reached in American universities -that of personal effectiveness. The ideal in England has always been that of personal culture; that of France the achieving, through competitive examinations of ready-made careers, the satisfaction of what Vallari calls "implegomania," the craze for appointment; that of Germany, thoroughness of knowledge; that of America, the power to deal with men and condi-

One by one the treasures of the an cient world disappear. The campanile of St. Mark in Venice followed the example of the "one hoss shay," and collapsed almost without warning, and now comes the news that Leonardo da Vinci's famous painting, "The Last Supper," in the convent of Santa Ma-Milan, is hopelessly ruined through the dampness and decay of the wall which it had adorned. Although it had frequently been repainted, one still felt, as he looked at it, that he was seeing the work of the great Italian. Hereafter one must be content with the sketches which Da Vinci made to guide him in his task of decorating the wall of the convent.

There is a good deal of talk about Dr. Lorimer's salary. He preaches in New York. Boston wants him, hav-

parsonage that is anything but a hut. It is a high-water mark salary, and causes discussion because there are ALTHOUGH CATTLE KING HEALY people who do not believe that a minister of the Gaspel should allow money to determine his location, or that any minister should be paid \$400 a week. A Unique Character in New Mexico, Telling your troubles only enlarges There is a business side to it. The demands made on a modern minister are immense. He must be an orator, a Seeds of discontent will take root thinker, a planner. He must have health, magnetism and that mysterious something that fills the pews, Santa Margarita mountains in New charges the very air with electricity, Mexico is a rude, barn-like cabin of and makes the people treasure his words and support his projects. You cannot fix the cash value of that kind of a minister. He is worth whatever a church can afford to pay him, and if the sum is \$20,000 there isn't a shadow of a doubt that he will do his community \$20,000 worth of sod.

The breweries and ought to be shunned. process of waiting for an intestinal reeds of warfare upon impure food. This is the very sound and sensible position King Peter says he is afraid it will taken by Secretary Wilson of the Dethe secretary has finally established a miscroscopic laboratory where all varieties of imported foods are examined before being submitted to the chemical tests and analyses in the chemical division. The revelations already made under the new regulations adopted by Congress are astonishing. Coffee berries, artistically shaped and browned, are found that consist of chicory, starch and other ingredients, and when ground present the appearance and give off the aroma of coffee. The cocoa adulterations disclosed by the microscope are said to be even more remarkable and more deceptive than the coffee adulterations. By means of the photo-microscopic camera for picturing adulterants and diseasebacteria and the microtone for cutting articles of food into infinitesimal pieces it is possible now to detect almost any food sophistication that may be attempted. Judging by frequent disclosures on the part of chemists, health bureaus and State food inspectors, Secretary Wilson has a great note the completeness of his prepara-

#### A Historic Lemon.

tions for the work.

Who ever thinks of connecting such a commonplace article of diet as the lemon with the romantic history of illfated Anne Boleyn? Yet indirectly she was the cause of its first introduction into England and so into popular notice. Henry VIII. gave such splendid feasts and pageants in honor of the coronation of Anne and of their previous nuptials as had seldom been accorded to queens of the blood royal. These kingly entertainments were in turn followed by the great civic feasts of London, for which the whole world was searched for delicacies, to add to the splendor.

At one such banquet, graced by the presence of the royal pair, a lemon was introduced as an elegant novelty. To an epicure such as Henry the acquisicovery-so says an old biographerlemon was six silver pennies!

#### Healy's Career.

James Healy went to New Mexico from Texas. He was born in Sedalia, Mo., in 1838, and with his parents went to Austin, Texas, in 1850. He has always lived on the plains and has no knowledge of any other life. He never went to school but three years, and that was on the plains of Texas. But he was born with rare sagacity and a peculiar border shrewdness that reads men at one glance and knows a schemer instinctively. So, while he is ignorant of worldly ways and has not the meagerest knowledge of the thoughts and aspirations of the people in the busy, pushing, progressive world outside of the lonely southern spur of the Rocky Mountains, where he has lived for longer than a generation, he knows cattle and sheep as thoroughly as any man ever did, and he has the natural rough skill to drive the best bargains for anything he buys or sells. His chief stock in trade is an iron constitution and a bravado nerve that made him well known on the frontier before he was 20.

He became a vaquero in Texas when he was but 17, and he has been at it ever since. He never talks about his possessions, and he is as close as an oyster when anyone tries to get him to tell what sums his semi-annual cattle shipments to Kansas City yield. But he will sit all night and smoke and drink whisky and claret mixed and tell his ideas about breeding long or short-horned cattle, about the relative profit in sheep or cattle and how he has many a time saved a good critter from death by disease and for shipment to the slaughter house. From the meagerest beginnings and with only tion of a castle in France would have a stout heart and two brawny arms as proved less acceptable, and such was his equipment for wealth production, the importance attached to the dis- James Healy has come to his present wealth. The story of his rise is as that a special record was made of the thrilling as any border fiction. The fact that the cost of this precious story tells how young Healy herded cattle in a region infested by Apaches; how he rode as a Texas ranger in the last Comanche campaign and was once picked up for dead on the scene of an Indian ambush; how he has fought and killed the most dangerous desperadoes in the cattle country at several times in his long experience on the southern border, and how he has trailed cattle thieves and rustlers for weeks at a time, all go to make incidents in as WHOSE LIFE SHE SAVED

Eight hundred miles from the nearest physician and with her husband in danger of dying unless operated on immediately Mrs. William H. Logan, of Bethany, Ill., who recently went to China with her husband as missionary, gave him an anaesthetic and successfully removed his appendix, following instructions he gave her before he relapsed into unconsciousness. When Dr. Logan had rallied sufficiently from the operation Mrs. Logan took him 800 miles by rail and wagon to a physician, where the treatment was com-

When he sold long journey they were brought to his cattle he bought more land. Then, grace his triumph at Susa .- Century. with more land, he increased his herd. With further sales of cattle, he bought more land. So he kept on buying land, trading for cattle and water rights occasionally dabbling in sheep and wool, until he has become a millionaire.

Healy reads with difficulty, and he has someone employed in the Las Veand collections there shipshape. He cert or anything theatrical or operation since 1870, and then in El Paso. So far as dress is concerned, he would be any day.

#### HAMMURABI OF BABYLON.

#### King Who Reigned Over Twenty-two Hundred Years Before Christ.

Hammurabi reigned in Babylon about 2250 B. C. We know nothing making it \$10,000,000, of Babylon before his time. There were other local capitals: Ur, Erech, Nippur and Lagash to the south, and Agane and Sippara to the north, each the gods. At Sippara the local divinity was Shamash, the sun god. We know the form under which Shamash was worshiped, for Mr. Rassam, in depth, the sacred image of the god. a bas relief on a large slab, accompanied by a memorial inscription of sented to him by two divine attendants. Before the god, resting on a are smaller symbols of the sun, the moon and Venus, and the cuneiform inscription explains the meaning of the composition. When this stone was the royal purse. found by the Arab workmen, they came running to Mr. Rassam and told him they had found Noah with his sons Shem, Ham and Japheth; and Mr. Rassam was so pleased that he killed an ox and made them a great feast.

In this city of Sippara and before the sun god's temple Hammurabi set up one of the great stone columns on more, until, in feebler succession, the longer.

#### \$400,000 IS REFUSED

#### FOR AN OLD LOG CABIN

The recent refusal of James and Henry Dennison of Swissvale, Pa., to sell their property adjoining the Carrie furnaces of the Carnegie Steel Company at Rankin to the United States Steel corporation for a sum said to be \$400,000 has created considerable interest in the property. Interest is especially directed to the old log house on the property, which is one of the oldest houses in Greater Pittsburg and has a history replete with interesting events. The Dennison farm comprises forty acres of river frontage west of the Carrie furnaces. It was originally known as the Troy farm and was owned by Eneas McCallister, who patented the land October 19, 1784. The original patent embraced 1871/2 acres.

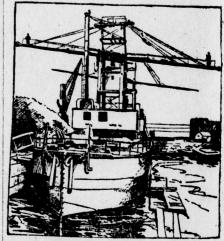

On December 17, 1788, McCallister sold out to John McDowell a part of the land, including the old Jack Adams farm, on which the Carrie furnaces stand. He also sold at the same time part of the Troy farm to Rinehart Antis, who in turn sold that part to John Milligan. John McDowell lived in the log house still standing. Magnus Murray purchased the farm in 1815 and it was sold by the sheriff to John Reed in 1822 for \$7,000. Real estate suffered a marked decrease in value after that, as is shown by the fact that on March 12, 1832, John Adams purchased a large portion of the

#### THEY CALL IT A "HAULABOUT."

The British navy has adopted a new device for supplying warships with fuel. Big steel barges are equipped with traveling cranes, two to each barge, moving along rails laid on either side of the hatches. When a warship arrives at a navy yard for coaling, one of the barges is towed alongside and the coal stored in the hold is worked out by means of the cranes. Each barge can carry 13,000 tons, and the cranes are capable of transferring this amount to other vessels in a comparatively short time. The barges are officially known as "haulabouts."

#### Story of a Little Girl.

A true story is told of a little girl, the daughter of a clergyman, who was ailing, and in consequence had to be put to bed early.

"Mamma," she said, "I want to see my dear papa."

"No, dear," said her mother. "Papa is not to be disturbed just now." Presently came the pleading voice:

"I want to see my papa!" "No," was the answer. "I cannot disturb him."

Then the four-year-old parishioner rose to a question of privilege. "Mamma," she said, "I am a sick woman, and I want to see my minister."

#### A Somnambulist.

A good story is told at the expense a patrolman, once, with great official zeal, grasped and held a citizen on his beat who was addicted to sleepwalking.

"Hold on!" cried the man. "You mustn't arrest me. I'm a somnambu-

"I don't care what your religion is!" exclaimed the ardent officer. "You can't walk the streets in your night shirt!"

The lawyer seldom works with a will until the doctor clears the way.

"Out of the Mouths of Babes."

On reaching home one evening, tired brought me her copy book, which she and the young face reddened with a beautiful and honest flush, for she knew as she turned over the pages some little words of praise and cheer would reward her hard attempt. The pages were very neatly written, and I told her what a pleasure it was to see how careful she had been. Presently we came to one on which were two small blots. As she turned the page, the little hand was laid upon them, and looking up into my face with an artlessness that was so beau- And I can tread beneath my feet tiful, she said: "Papa, don't see the blots!" Of course I did not see them, but I bent down and kissed the little forehead and was thankful for the lesson I had learned. How precious it would be if amid all the nameless strifes and discords that so much fret and chafe us, we could just lay the finger on the sullied page of human When patience smiles her royal smile; lives and not "see the blots." When littleness and meannesses and petty oppositions annoy and vex us, if we could only look away from these to some brighter page. In all our bleared and blotted books, there are some Make up the sum for you and me. "leaves of healing." And when on bended knee we bring the day's poor purposes and poorer performances to the great Father, and say, "Forgive us our trespasses," let it be with the soft undertone of the child's filial faith. "Father, do not see the blots."-G. H. G.

#### Advice on How to Succeed.

HERE are some faint signs of a waning in the epi demic of advice on how to succeed. It is futile enough, as a rule, for one man to give advice to another in a particular case when his advice has been sought and when he knows all the main facts. But what an utter waste of time for one man to advise an infinitely large and wholly unknown audience of all ages, conditions and aptitudes. And upon such a subject as success! What is "success?" Does anybody know? Can anybody tell? The treacherous blow, the cruel thrust; Is it to earn \$10,000,000 and lose friends, family life and health? Is it to become President or Senator and lose manly self-respect by truckling to bosses, lying about one's real views on every important question and making one's self a mere voting machine to register the will of an in-But what is this? Drops make the sea; terest or a combination of interests in control of the cama book to eatch the crowd-a book one must apologize for to all one's acquaintances? Or is it merely to keep one's self-respect, to work conscientiously at the task in hand and to care not a rap for consequences? When Shakspeare made Wolsey say, "Fling away ambition," he was expressing something more than the bittersess of a soured and A suggestion lately made by an ex-stricken statesman. Whenever a man entertains an ambichange may aid some one whose mem- tion beyond the development of his own intellect and charory is defective to fix in the mind the acter, doesn't he mount himself upon a steed that has never yet been broken to bridle?

What the devourers of advice on success are really It is believed that Rev. William cess of adding, or rather of affixing, seeking is something they can never find—how to succeed is necessary to merely maintain existence. Under such Howe, D. D., of Cambridge, Mass., is and the number of books in it is reach- without work. At bottom all the envy of the well-to-do in conditions the operatives in American factories are made the oldest living clergyman in this ed. world is through work, plenty of hard work, and that to an illustration, and which is still induce any man to work there must be compulsion-compulsion of responsibility or compulsion of necessity. Yet who believe it in the bottom of their hearts? Not many .-Collier's Weekly.

EFORE 1862 there was a good boating stage of water through the open season in the Western rivers. This ranged in the Ohio and Mississippi from twelve to fifteen feet. Now, in nearly all the rivers, there are periods when the water is very high, and other

Forty years ago the smaller rivers and streams in Ohio,

Many of the springs famous forty years ago are no longer in existence. Streams that then gave a regular supply of water to hundreds of farms are now in the summer time simply a series of pools. Even in our largest standing, signed the articles of secesrivers in the dry season there is scarcely water enough for sion. The body was composed of the navigation, while in the spring come great floods like that deposed Governor Jackson and 39

There is a reason for this change. Fifty years ago the native forests in Ohio, Pennsylvania and New York were in their wild state. The trees had not been cut and the underbrush had not ben cleared away. Now these forests have all been cut. Where there were square miles of forest | United States and the State of Misthere are now square miles as bare of trees as the prairies

Forty years ago the headwaters of all our great river systems were in highlands covered by trees. Gradually inroads were made upon these forests, and the mountains in which are found the fountains of the Ohio River system are now denuded. In the mountain regions at the sources of the Missouri and its tributaries two-thirds of the timber has been cut. In Wisconsin and Minnesota, on the headwaters of the Mississippi, 90 per cent of the trees have been cut. \* \* \*

Had the forests on the mountains and foothills not been cut or been destroyed by great forest fires, the snow would not have melted quickly and the heavy rainfall would, in part, have been retained in forest lands. Under present conditions, however, the thousands of mountain streams ran with overflowing banks to the rivers, and the paign committee and therefore of the party? Is it to write great river became a terrific agent of destruction.-Chicago Inter Ocean.

#### Warning to Strikers.

E all know from past experiences that it is quite possible for the members of a great community, in all except their food supply, to subsist when the outputs of mills and factories are reduced to less than half of the amount which it is possible for them to produce. But such a shutting-down means that the great mass of the wage-earners are no longer

##

#### Modern Terms of Measuring Affactions

of the Human Heart. The old millionaire entered his study and after carefully bolting the door behind him sat down at his desk and began to rummage in the capacious bottom drawer, says the St. Louis Globe-Democrat. A look of intense anxiety overspread his seamed and rugged visage as he failed to find the object. of his search, but presently this gave way to a smile when further search rewarded his endeavors. He gave a sigh of relief and settled back in his chair to examine the packake of old to ignite again in the old man's heart the flame that had glowed there iong ago. For see-a tear gathers in his sunken eye and slowly rolls down his wrinkled cheed. "Dear little Amy," he whispers. "Dear little woman! how foolishly fond of you I was in those days. You were, indeed, the dearest woman I ever met. Your breach of promise suit cost me a cool \$25,000!"

#### Sea-Water Bread. A Philadelphia baker is the authority

for the assertion that the latest fad of dyspeptics is bread made wth seawater, instead of fresh water. "It has a saltier taste," he says, "than we are accustomed to, but it is very palatable. In fact, he who likes salty things is apt to like it better than the other kind of bread." A physician." he says, "asked me about three months ago to make some of this bread for his patients. At first I made six loaves a day, but now I make thirty. My seawater comes up to me three times a week. The dyspepties who buy the bread say it is the only kind they can eat fresh without discomfort."

#### A Unique Pet.

The wife of the governor of North Borneo has a pet that few people will envy her. The governor's house is near a jungle, and out of this there strayed one morning a baby rhinoceros. Captured as a curiosity, he soon became tame, and now refuses to return to the wilds. Sixteen quarts of milk a day is what this pet requires, and on it he thrives and grows fat. He does not look much like the fullgrown rhinoceros, and might be mistaken for a curious sort of hog, were it not for his single horn. He is devoted to his mistress and follows her about like her dog.

#### Pertinent Reply. "Say," queried the inquisitive persons

as the stranger paused to light a cigar. 'may I ask what your business is?" You may," replied the stranger.

"Well," said the rubber-necker after a pause, "what is it?" "Minding it," said the stranger.

"Minding what?" asked the astonished party of the preface. "My business," was the significant reply.

Never try to dispose of wedding presthat the men never use that word in ents if you would preserve your couftdence in friends.

#### **COULD NOT WELL BE SPARED**

INE times out of ten when you scratch a farmer you scratch a tyrant," said a suburban man who always has a new theory in his vest

"It's a fact; I'm a farmer's grandson, a farmer's son, and a farmer myself, so I know what I'm talking about. To own land and have sole control of everything his eye lights on is what makes a man a tyrant. The man who bosses farm hands all day, and who bosses horses, cows and pigs from morning till night, naturally gets to bossing his wife and his sons and daughters. He is czar of his small rural Russia, and it takes a firm hand to hold him down. That's why so many farmers have feuds with other farmers in their neighborhood-so many czars naturally come in conflict, and fall out.

"More than any other man in the world," continued the amateur preacher, "the man who lives in the country needs a good, firm-handed, hightempered wife to hold him in, and make him behave himself. Every farmer who will tell the truth will tell you this. The farmer's wife must be a good fighter-for she has, in most cases, lots of fights to fight. She has to fight for her chickens-the tyrant-farmer always tries to meddle with his wife's chickens; she has to fight for college educations for her sons and daughtersshe has to fight for all their privileges and pleasures. The average farmer never can understand why his children don't love farm life as well as he does. The farmer's wife has to keep peace betwen him and his neighborsshe has too often to contend to get a horse to go to town with on little pleasure jaunts of her own. Oh, these things are all true, in too many farmers' families. "The farmer is a fine fellow, and the world couldn't spare him, but he

does love to boss to beat the band. Two of my daughters have married farmers, and I put mischief into their heads in good season and taught them how to hold their own. A man respects a woman who won't let him have his own way too much. My wife has regulated me until I'm pretty respectable-and that's why I see all these things. Most farmers are big tyrants-yes, sir."-Detroit Free Press.

open naturally to this article, my her: friend," and he soberly passed the magazine to the clergyman, who read aloud: "Some Curious Cases of Circumstantial Evidence in Criminal Trials."-Youth's Companion.

OFFICE-Postoffice Building, Co Grand and Linden Avenues.

SOUTH SAN FRANCISCO, CAL. Branch Office, 202 Sansome St., San Francisco, Room 4, third floor.

SATURDAY, AUGUST 15, 1903.

Peace hath her victories. The Grand Army has captured San Francisco.

The S. F. Call of Monday gave the Colma incorporation schemers a red hot roasting. The Call hits several mails on the head in its article, but we do not see why Supervisors Eikerenkotter and Debenedetti should be caricatured so as they have been by the Call pictures.

The welcome of San Francisco to the grizzled veterans of the Grand Army of the Republic is great, grand and glorious. It is well. The Grand Army will shortly be no more than a glorious memory, whilst the guardian city of the Golden Gate and Mistress of the Pacific seas stands in the dawn of her future greatness. These veteran soldiers of the Republic made the future San Francisco possible. This grand meeting is hail and farewell, for never again will the members of the Grand Army gather on the quick succession ring the echoing comshores of the Pacific.

It is claimed that the Board of Supervisors are bound by law to grant the petition of the Colma incorporation schemers. Such claim is preposterous if it means granting petition with all the territory the petitioners see fit to demand. As a matter of fact Colma, if incorporated, should not cover to exceed one-half of one square mile. That area would include all the territory upon which there is any semblance of a town settlement. However, should the Supervisors grant the petition for one square mile, with Colma Station as the cen- Gordon in Scribner's. ter, we venture to say the petition wouldl be withdrawn with a celerity Influence of Laughter on Digestion. and unanimity that would break the record. Incorporation of Colma on assimilation and alimentation has legitimate lines is not desired by passed into such a common physiologthose who are pushing the Colma petition. The whole thing is a brazen, impudent scheme and will fail as it deserves to do.

#### TRIBUTE TO THE GRAND ARMY.

Every beneficent feature which characterized American institutions was at stake in the great Civil War. every aspiration of humanity throughout the world in behalf of personal liberty and self-government was involved in that struggle. Without success of the Union arms all these would have perished from the earth. What remote benefits mankind has yet to enjoy as a direct result of the preservation of the American Union, by force of arms, can only be determined when the great Republic shall have fulfilled its destiny, and its history has become a classical study in the curriculum of the far distant fu-

Everything in our National life symbolized by the flag was preserved for us by the men of the Grand Army of the Republic; and the flag itself, in their hands, was expanded to such ample scope and universal application to the affairs of man, that under its beneficent folds injustice or oppression is impossible.

the streets of an American city may custom. well be received with affection, gratitude and reverential awe. - Major-General Arthur MacArthur in Sunset Magazine for August.

#### A TEMPEST OF BATTLE.

#### Stirring Description of a Cavalry Charge at Gettysburg.

A cavalry charge met by a counter charge of cavalry is still perhaps the most terrible spectacle witnessed in war. If the reader has never seen such a charge he can form little conception of its awe inspiring fury. Imagine yourself looking down from Gettysburg's heights upon the open, widespreading plain below where 5,000 horses are marshaled in battle line. Standing beside them are 5,000 riders armed, booted and spurred and ready to mount. The bugles sound the "Mount!" and instantly 5,000 plumes rise above the horses as the riders spring into their saddles. In front of the respective squadrons the daring leaders take their places. The flutter ing pennants or streaming guidons, ter to each regiment, mark the left of the companies. On the opposite slope of the same plain are 5,000 hostile horse men clad in different uniforms ready to meet these in countercharge. Under those 10,000 horses are their hoofs, iron A MACHINE TO MAKE THE DEAF HEAR. | she was sent to scare out the few ous tread the plain is soon to quiver. straining bits, and as the bugle notes impulse with the dashing riders. "For con is made so as to correct these rently oblivious to their glances ward!" shouts the commander. Down faults. the lines and through the columns ir mands, "Forward, forward!" As this order thrills through eager ears sabers flash and spurs are planted in palpitat ing flanks. The madiy flying horse thunder across the trembling field, filling the air with clouds of dust and whizzing pebbles. Their iron rimmed hoofs in remorseless tread crush the stones to powder and crash through the flesh and bones of hapless riders who chance to fall. As front against front these furious riders plunge, their sweeping sabers slashing edge against edge. cutting a way through opposing ranks gashing faces, breaking arms and splitting heads, it is a scene of wildest war. a whirling tempest of battle, shert lived, but terrible.-General John B.

The efficacy of laughter as an aid to ical truism that no one of ordinary intelligence needs to have the principle upon which it works elucidated for his understanding in these days of widely disseminated dietetic knowledge, The average person who is not continprocesses without laughter.

#### Buttoning a Coat.

Buttoning a man's coat from right to left was the original way, when our ancestors, wrapped in skins, held the right edge with the left hand and naturally inserted a fastening thorn with the right hand. This right to left custom has been retained by the Hebrew priests in their garb to this day. When fighting men became necessary and swords and knives had to be drawn by the right hand from the transfers their energy to the fluid of left side, the edge of the coat, buttoned from right to left, was found to be in the way, and men began buttoning The living remnants of the mighty from the left. Nonfighting women Army of the Union marching through and priests continue to follow the old from the left. Nonfighting women One of the Amusing Incidents During

#### The Helping Word.

There was a certain old woman who was a constant and devout attendant at church. Her husband died, and her pastor called upon her to comfort her in her sad bereavement.

"Well, my good woman," the pastor remarked, "in your bitter trial I hope talking together in groups. Every you have found some ray of comfort stranger who entered was eyed susfrom the Scriptures."

"Indeed I have, dominie," was the confident though tearful reply.

"That's grand, sister," exclaimed the

Poets, as a dining hall had not been cleared, and rule, will not read the newspapers at

#### Two Were Borrowed.

Apropos of President Roosevelt's fondness for large families, a story of his experience as police commissioner is told by a sergeant now on the force. It seems that the wife of a policeman who had just been fined a week's pay for drunkenness appeared one day in the commissioner's office, accompanied by three neatly dressed and attractive-looking children. Her pitiful story of back rent, which the subtracted to the children moved Mr. Roosevelt's sympathy, and, taking out his pocketbook, he gave to the woman the amount her husband had been fined. The next day the husband appeared "That may be," said his host, "but it spond to a knock; this roused more suss at headquarters and was asked by a brother officer:

"Say, how many children have you

at home?" "One," was the reply.

"But your wife was around here yesterday with three children." borrowed two of them for the occasion."

General Alexander McDowell Mc-Cook had a story illustrative of readiness in excuse which he used to tell occasionally. Some raw troops were drawn up for their first battle. They were on marshy ground, under fire, and ankle deep in slush. One of the soldiers was noticed to be trembling excessively, and his fear might communicate itself to his comrades. An officer approached him.

"Here, you, what are you trembling for?" demanded the officer. "Stop it, or you'll demoralize the company. You are in no more danger than any one else. Don't be afraid."

"I-I-I am not-t-t a-a-afraid," chattered the soldier. "I-I-I had the ague last year, and-and standing still in this m-m-mud so long has b-b-brought it on aga-again. W-w-wouldn't it-t-t be a g-g-good idea to r-r-run a lit-little and get warmed up?"

#### Suicide by Smolding.

One of the most extraordinary suicides on record was enacted in Pesth. Baron Rela Olyi, a wealthy citizen, deliberately poisoned himself by smoking cigars and tobacco to excess. The baron had lost a large fortune in speculation: Having a wife and six children. he insured himself very heavily in their behalf in five companies and then proceeded to put into operation his unique plan for self destruction. He hired a small room in a mean portion of the city and in ten months died of what the doctors called "galloping con sumption." He had consumed 3,500 ci gars and about a hundred pounds of to

"My boy says his ambition is to grow up to be a man just like his father." "I wouldn't let that worry me. When Arizona Sunshine.

To one who has been there, says Caspar W. Hodgson in Sunset Magazine, the name Arizona, first of all, suggests sunshine and plenty of it. Nowhere on the globe is sunshine more abundant, more appreciated or more harmless. Indeed, a sunstroke has never been recorded in this territory. Though all good Arizonians have crossed the Hassayampa river, which act, according to tradition, divests one of the power to tell the truth, I believe their records are accurate as to sunstroke. The explanation is found in the fact that heat is not so much a matter of thermometer as of humidity.

The dry, hot air of the Arizona desert is invigorating to the initiated. One can learn to love the desert. There the sunrises and sunsets are intensely beautiful and nowhere on earth richer in color. This is sometimes called Sunset Land. It might also be called Land of Sunrise .-- Sunset Magazine.

mospitality Pays.

Cities and communities frequently expend large sums of money in entertaining conventions, conferences and other public gatherings, both because of a spirit of hospitality prevailing or through a sinister desire to "advertise the city." After the affair is over and the visitors have gone their several ways the people ask one of the other, "Does it pay to spend money thus?" There never was a case of public hospitality that didn't pay, if not in dollars and cents, in the extension and broadening of that finest of all sentiments, the brotherhood of man .- Dayton Herald.

Ruskin's tavorite adverb was "entirely." Over the grave of his father he put a memorial stone describing the I was your boy's age I had a burning elder Ruskin as "an entirely honest merchant.'

A new pigs-foot shaver is the latest piece of machinery installed at the Western Meat Company's packinghouse.

The famous Palo Alto stock farm, which was founded thirty years ago by Senator Stanford, was practically closed Saturday. The positions of the superintendent and his assistants have lapsed and no breeding or other have lapsed a work will take place upon the farm from now on. There are still 160 David and Jonathan, Damon and horses which have to be kept until Pythias, Goethe and Schillernext fall and a few men will be re-tained to care for them until that Tom Mason and wife and Miss Hannah Cohen left Monday to attend the Pocahontas Convention at Sacramen-

Senator Stanford founded and kept up this great institution for many years at great expense and the marvelous success which he gained in breeding blooded stock is a matter of history. He built magnificent barns, dreds of horses all the time. There were two farms, one on the border CALL AND SEE between San Mateo and Santa Clara counties for trotters and another near Mayfield which was a running farm. -San Mateo Leader.

Nicodemus the Slave. Nicodemus, the slave, was of African

birth. And was bought for a bagful of gold; He was reckoned as part of the salt of

But he died years ago, very old. 'Twas his last request, so we laid him away

In the trunk of an hollow tree; "Wake me up," was his charge, "at the first break of day-Wake me up for the great jubilee,"

He was known as a prophet, at least was as wise.

For he told of the battles to come; And we trembled with fear when he roll'd up his eyes, And we heeded the shake of his thumb.

garments he wore Were in patches at elbow and knee, And he still wears the suit that he used

Tho' he clothed us with fear, yet the

to of yore, And he sleeps in the old hollow tree.

Nicodemus was never the sport of the Though the bullet has oft cross'd his

path: There was none of his masters, so brave or so rash

As to face such a man in his wrath. Yet his great heart with kindness was filled to the brim. He obeyed who was born to command,

But he longed for the morning, which then was so dim. For the morning which now is at hand.

Twas a long, weary night, we were almost in fear That the future was more than he

knew: Twas a long, weary night, but the morning was near.

And the words of our prophet are

There are signs in the sky that the darkness is gone,

There are tokens in endless array; While the storm which had seemingly banished the dawn-Only hastens the advent of day.

The good time coming is almost here! It was long, long on the way; Now run and tell Elijah to hurry up, Pomp. And meet us at the gum-tree down in the swamp.

CHORUS:

To wake Nicodemus to-day.

I Cannot Sing the Old Songs. I cannot sing the old songs

I sung long years ago, For heart and voice would fail me And foolish tears would flow; For bygone hours come o'er my heart With each familiar strain-I cannot sing the old songs Or dream those dreams again,

I cannot sing the old songs, Their charm is sad and deep, Their melodies would waken Old sorrows from their sleep. And though all unforgotten still And sadly sweet they be,

Or dream those dreams again.

I cannot sing the old songs

I cannot sing the old songs, They are too dear to me, I cannot sing the old songs, They are too dear to me.

I cannot sing the old songs, For visions come again Of golden dreams departed And years of weary pain: Perhaps when earthly fetters Have set my spirit free, My voice may know the old songs For all eternity. My voice may know the old songs

For all eternity. -Claribel.

#### DU CHALLU'S FIRST GORILLA. A Thrilling Incident in the Life of the Famous Explorer.

Paul Belloni Du Chaillu, the famous

traveler, who died a short time ago, was the center of a fierce controversy forty and fifty years ago, when his stories of life in Central Africa, and his discovery of the gorilla, since confirmed, were menounced as gross exaggerations, if not absolute lies. He never fully overcame the effects of his defamation and vilification, and although he lived to enjoy many honors, he did not reap the full reward due to his achievements. Born in New Orleans in 1838, he was early taken to Africa by his father, who held a consular appointment in the Gaboon. In 1852 he published a series of newspaper articles about the Gaboon country which attracted much attention. In 1855 he returned to the West Coast of Africa. Unaccompanied by any white man, he traveled distance of 8,000 miles in a practiclly unknown country. He killed and uffed 2,000 birds, including many w species, and many gorillas, of ich he brought the first accounts to ope. It was his vivid and elodescription of these huge and ious apes that excited incredu-

> is the account which he gave encounter with his first gorilla: valenly an immense gorilla adwarput of the wood straight toup, and gave vent, as he came as to rrible howl of rage, as much

which a lone male, the kind This fell ways the most ferocious.
with his hade the woods resound which is really an awful sound, embling the rolling and muttering together, and as about to take aim

stopped me, saying, in a whisper, 'Not HABITS OF THE SEAL land, or the desolate shores of extreme

"We stood, therefore, in silence, gun in hand. The gorilla looked at us for a moment or so out of his evil gray eyes, then beat his breast with his gigantic arms-and what arms he had! then gave another howl of defiance For the Fur and Oil Thousands of and advanced upon us. How horrible he looked! I shall never forget it. Again he stopped, not more than fifteen yards away. Still Malaonen said, 'Not yet.' Good gracious! what

beast? "Again the gorilla made an advance yards off. I could see plainly his ferocious face. It was distorted with rage; his huge teeth were ground against each other, so that we could hear the sound; the skin of the forehead was drawn forward and back rapidly, which made his hair move up and down and gave a truly devilish expression to his hideous face. Once more the most horrible monster ever created by Almighty God gave a roar which seemed to shake the wood like thunder. I could really feel the earth tremble under my feet.

"The gorilla, looking us in the eye and beating his breast, advanced

"'Don't fire too soon,' said Malaonen; 'if you don't kill him, he will kill you.

"This time he came within eight yards of us before he stopped. I was breathing fast with excitement as I only said, 'Steady,' as the gorilla came nen said, 'Now!' And before he could utter the roar for which he was opening his mouth, three musket balls were in his body. He fell dead almost without a struggle."

#### SONDAE HAD NO PATENT

#### And Any Soda Dispenser Could Sell His Drink.

Sunday, Sunda, Sondae.

Take your choice, for they all mean the same as applied to the refreshment offered at the soda water fountains.

Nearly everybody calls this form of cold refreshment "plain Sunday." If a hundred admirers of the food, drink or what you may be pleased to describe it, were asked how it got its name, the majority would either say, "don't know," or probably "first served on Sunday.'

The Sondae (properly spelled), came from the name of a man. Robert Sondae, of French descent, was formerly a soda dispenser in Buffalo, N. Y. When the ice cream soda came into vogue, Mr. Sondae noticed that a great number of the people simply ate the cream, and left the liquid. He had before noticed, as had probably hundreds of others, that many people would not take plain ice cream, because it was not flavored highly enough. From these observations he took the cue of the present Sondae. He put a little ice cream in a small glass and covered it with crushed fruit. It looked good, and it tasted good, so it became the most popular form of cold refreshment in Buffalo in a few short weeks.

From that city it spread to all parts of the country, but while it retained the original sound of the originator's name, the spelling came to be erroenously accepted as "Sunday." From one part of the United States to the other, in every city, town and crossroads-wherever a soda fountain is to be found-there are posters in windows which say "try our Sundays." The spelling is almost uniformly given the same as the first day of the week. Mr. Sondae had no patent, copyright, or other safeguard on his original formula, and so he is still dishing out the "cold stuff" at the same old stand. Many men have acquired fortunes for producing considerably

#### A New Disease. "Motor intoxication" is a new disease

discovered by the savants of Paris. It is the temporary mental disorder of speeding automobilists. M. Hachet Souplet, at the last meeting of the Societe d'Hypnologie et de Psychologie, spoke of the intoxicating effect of rapid motor locomotion. The mental and moral state of the driver becomes abnormal. He grows vindicative, furiously aggressive, and lets himself be carried away by the angry impulse of the moment. The high rate of speed works him up into the very same state of mind which makes the habitual drinker of alcohol regardless of consequences. Both abuse, swear and use vile language. M. Machet Souplet quoted a number of instances from police reports of trials of automobilists in which self-control and the sense of dignity entirely deserted gentlemen of high education and breeding. Dr. Berillon, an eminent man, corroborated everything M. Hachet Souplet had said. Dr. Berillon knows a motorist who ran over a peasant and rushed on after he did so as furiously as before. He returned home in a state of depression that follows a long rush forward at the pace of an express train, and never gave a thought to his victim on the road until he read three days after how he had killed him. He then felt very sorry, declared himself guilty of the death of the peasant and settled an annuity on his family.

#### AN INTERESTING CREATURE OF COMMERCE.

Men Every Year Imperil Their Lives -The Romance of an Unfortunate

Not the least interesting sight witis to become of us if our guns miss nessed by the visitor to San Francisco fire, or if we only wound the great are the rocks covered with seals, which lie not far out in the bay and are easily discernible from the Cliff upon us. Now he was not twelve House. At times the piles of stone and earth projecting above the water are so filled with the smooth-furred creatures that none of the rock is visible. The bay itself swarms with the animals, which assemble on these Seal Rocks, as they are called, to bask in the sunshine. Should the visitor attempt to study the animals at close range he would find them extremely interesting. Of American animals there is none more valuable or sought after than the fur-seal and no creat ure of the numerous American animal family is more interesting or intelli gent. They live in the sea, but always in the neighborhood of the coasts where they wage an incessant warfare on the fishes, which constitute their principal food. They enjoy climbing upon rocks and beaches along the shore. When out of the water they are exceedingly watchful, and appear to have sentinels to give notice watched the huge beast. Malaonen of the approach of an enemy, plunging into the water the moment any . . . When he stopped Malao- danger approaches them. On land they are very awkward. Their movements are performed by the actions of the from field to field, across yawning strong muscles of the back. The creatures take hold by their forenaws, ticed and sometimes night draws on, while they curve the back strongly

South America, whence they return, after long voyages attended with incredible hardships, loaded with the valuable products of the seal. The sealing craft generally start out about the first of March. From 16 to 35 hands usually compose a crew, many of whom are provided with large guns, and the rest with stout clubs or bats. Each man has also a pole or gaff, provided with a hook at the end, to assist him in leaping from piece to piece when among loose ice. Often it is necessary to cut, with ice saws, a broad channel through the midst of the harbor to the open sea; and as the united crews of a sealing fleet sometimes number 2,000 men, it may properly be supposed that the broad, icy plain displays a scene of no ordinary animation and excitement. Once the vessels are in the open sea, a day's run will bring them to the edge of an ice field, where myriads of seals are discovered with their new-born young. first little sore appears the whole The young produce an oil that is both valuable and abundant and, as it takes but a slight blow with a bat to kill them, they are easily made captive. The gun is used to shoot the old seals. As soon as a seal is killed-and sometimes even before-a circular cut is made with a sharp knife around the neck and a longitudinal one down the belly to the tail. The skin with the surface 'fat is "scalped" off, forming altogether a "pelt." This alone is taken and the carcass is left on the ice. Barring accident a vessel in a locality where seals are thick will have its hold filled in ten days. The ad-

venture is full of hazard. In the excitement of the pursuit after the seal, leaps of terrific risk are taken chasms, whose terrors are scarcely nowith the hunter then first realizing that he is many miles from his vessel,

Times-Democrat.

## The Innocent Suffer The Guilty ?

The world to-day is full of innocent sufferers from that most loathsome disease, Contagious Blood Poison. People know in a general way that it is bad disease, but if all its horrors could be brought before them they would shun it as they do the Leprosy. Not only the person who contracts it suffers, but the awful taint is transmitted to children, and the fearful sores and eruptions, weak eyes, Catarrh, and other evidences of poisoned blood show these little innocents are suffering the awful consequences of some body's sin. So highly contagious is this form of blood poison that one may be contaminated by handling the clothing or other articles in use by a person afflicted with this miserable disease. There is danger even in drinking from the same vessel or eating out of the same tableware, as many pure and innocent men and women have found to their sorrow. The virus of

Contagious Blood Poison is so powerful and penetrating that BLOOD POISON IS NO within a short time after the drop of blood in the body is tainted with the poison, and the

## system is infected and every RESPECTER OF PERSONS

skin is soon covered with a red rash, ulcers break out in the mouth and throat, swellings appear in the groins, the hair and eyebrows fall out. and unless the ravages of the disease are checked at this stage, more violent and dangerous symptoms appear in the form of deep and offensive sores, copper colored splotches, terrible pains in bones and muscles, and general breaking down of the system.

S. S. S. is a specific for Contagious Blood Poison and the only remedy that antidotes this peculiar virus and makes a radical and complete cure of the disease. Mercury and Potash hold it in check so long as the system is under their influence, but when the medicine is left off the poison breaks out again as bad or worse than ever. Besides, the use of these minerals bring on Rheumatism and stomach troubles of the worst kind, and frequently produce bleeding and sponginess of the gums and decay of the teeth. S. S. S. cures Blood Poison in all stages and even reaches down to hereditary taints

and removes all traces of the poison and saves the victim from the pitiable consequences of this monster scourge. As long as a drop of the virus is left in the blood it is liable to break out, and there is danger of transmitting the disease to others. S. S. S. is guaranteed purely vegetable and

can be taken without any injurious effects to health, and an experience of nearly fifty years proves beyond doubt that it cures Contagious Blood Poison completely and permanently. Write for our "Home Treatment Book," which describes fully the different stages and symptoms of the disease.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

#### SELF INDUCED AILMENTS.

#### The Folly of Nursing the Habit of Not Feeling Well.

Few people realize that their ailments are largely self induced, says O. S. Marden in Success. They get into a habit of not feeling well. If they get up in the morning with a slight headache or some other trifling indisposition, instead of trying to rise above this condition they take a positive pleasure in expatiating upon their feelings to any one who will listen. Instead of combating the tendency to illness by filling the lungs with pure, fresh air they dose themselves with "headache tablets" or some other patent specific warranted to cure whatever ill they think they are suffering from. They begin to pity themselves and try to attract pity and sympathy from others. Unconsciously

There is greater danger that young girls who are delicate while growing up and lounge around the house and lie down whenever they feel the least bit out of sorts will form a habit of inva

lidism when they reach maturity. How often do we see such girls "brace up" at once when anything hap pens which interests or excites them An invitation to a reception or a ball or any other pleasant social function acts like a tonic. For the time being an in stantaneous cure is effected. They are as well as anybody until after the en tertainment.

Indulgent mothers are frequently to blame for this physical and mental lazi ness, for it is nothing more, on the part of their daughters. A lounge or sofa is a positive curse in many a home, be cause it is such a temptation to lie down and succumb to trifling sugges tions of illness or the least indisposi tion. A habit of giving in whenever you "don't feel like it" is fatal to all achievement and ruinous to self discipline, self poise and nobility and dignity of bearing.

#### She Knew It.

"The longer I live," sighed the sage. "and the more I learn the more firmly am I convinced that I know absolutely nothing!"

"I could have told you that twentyfive years ago," said his wife, "but I knew it would be of no use."-London

#### HAPPY HITS.

Don't open a set of account books when you do a kindness for anybody. Advantages always look larger than disadvantages, even when the scales are balanced.

Don't marry money. You can spend the money, but you can't spend the trouble you may get with it.

Somehow when a brother and sister quarrel it comes nearer to what a man and wife say than any other thing. Occasionally you know a man you

can't help admiring, but who is such a fool that you want to beat him to death. Somehow a scrambled egg reminds us of a failure. The cook didn't get the

egg out whole, so she scrambled it Some people make scrambled eggs of half they do. When a man's folks are away and

he goes to a restaurant to eat it seems pretty tough to pay 35 cents for a meal. At home he doesn't realize that he is paying anything.—Atchison Globe

#### The Revolution In a Nutshell.

The following contribution to historic literature on the American Revolution was made by a little lady to a short story competition in a Philadelphia newspaper. The writer, a schoolgirl of ten years, epitomizes the whole Valley Forge experience in the following terse sentences:

"There was a Revolutionary war. The British revolutioned Philadelphia. So Mr. Washington took a lot of soldiers to Valley Forge. Mr. Washington haden't eny thing for the soldiers to eat, so they had to go barefoot. Mr. Washington felt ver bad, so he asked Benjamin Franklin. Benjamin Franklin felt bad, to, so he asked the king of France. The king of France sent a lot of soldiers, so we licked the British."

The Customs o' the Country. There was once a Newfoundland fisherman-he chanced to be a Catholicwho in old age came to die. He had lived in debt all his life and, no doubt, had never once given his whole catch to the dealer who supplied him, but had wrongfully slipped many a quintal over the side of a rival schooner and traded it out on the spot.

"Send for Fawther Rafferty," he said. "Send immediate!" He wanted to confess his sins, to

be shriven and to depart in peace, but his old priest had been transferred to Trinity Bay. A young man, just back from Rome, was now the spiritual head of the parish. "Sure, 'tis Fawther Codlin," they

told him.

"Noa, noa!" the old man protested. "Fawther Codlin's a fine young mana clever young man, I doubt me not, but 'tis old Fawther Rafferty I wants t' hear me confession." "An' why?" they asked.

"Sure," the dying man gasped, "be knows the customs o' the country."-Norman Duncan in World's Work.

#### A Contrast In Lungs. Three human lungs lie next one an-

other in the anatomical museum at Edinburgh university. The first is that of an Eskimo and is snow white. In life this would, of course, be ruddy from the presence of blood. The third is that of a coal miner and is coal black. The intermediate one is that of a town dweller and is a dirty slate gray, as are the lungs of all dwellers in cities at this moment.

#### AUTOMOBILE LAWN MOWER.

How It Works on the Grounds of the National Capitol.

Thursday evening in the presence of a Bulletin representative and many others. Edwin Rabjohn and Alfred Harwood took dictation at the rate of 190 words a minute and read their notes rapidly, fluently and accurately. On a special one-minute test they, with appaarent ease and grace, wrote 221 words. This record stands unparalleled by any one of Mr. Kabjohn's age, he being but 17 years old.

In an interview Mr. Rabjohn said: "I owe my indebtedness for my accomplishment of speed and accuracy to the San Francisco Business College, and their excellent Gregg System of Shorthand, as well as their ability to teach the system. With my knowledge of other systems of shorthand I don't believe I would have ever been able to attain this speed with any other system. The Gregg System is written in one position, one shade and but one slope and is simple in every sense, while other systems are extremely complicated."

Mr. Harwood also writes the Gregg System and is a graduate of the above school. Mr. Harwood was very much surprised that he was able to write so rapidly, as he has had absolutely no chance to take a dictation for ten months.

Mr. Harwood says: "I guess I can't forget Heretofore the mowing of the several hundred acres of lawn that surround the Capitol was considerable of a problem, says the Washington Star, and many men were annually engaged ing about it."-New York Times. in the work. From April to October they were kept busy with mowers, scythes and sickles, and there was no time when the entire grounds were clothed with an even coat of grass. This is no longer a fact, for the automobile has taken its place in the utely no chance to take a dictation for tenmonths.

Mr. Harwood says: "I guess I can't forget
it; after ten months of absolutely no ractice
I find that I write just as well as I did when
I graduat.d."

G. I. Pringle, teacher in the above school,
wrote on the typewriter from dictation at the
rate of \$5 words a minute for several consecutive minutes without a single error.

The San Francisco Business College, 1236 Market St., has been established 15 years and is
now the largest business college on the Coast.

S. F. Bulletin, Aug. 3, 1963. grounds of the Capitol and pushes and pulls a regulation revolving lawn mower all over the place.

The engine that drives the blades has the general appearance of a small asphalt roller, except that all of the It will make you ready to eat, give a relish metal work is copper and brass, giving the machine the appearance of a small fire engine. On the front seat is room for two men, and beside the engineer are levers that control the engine and Our goods have stood the test of time.

Wichman, Lutgen & Co., S. F.

enable him to operate it in any direction as quickly as a man can turn a hand mower. The rudder is a small roller that trails along behind the revolving blades, and by the turn of the wrist the little wonder executes all manner of maneuvers except to climb trees, and it all but does this, for it will cut as near to the trunks as can a man with a sickle.

The gear is arranged from the engine, the power of which is steam. The front rollers serve the purpose of wheels and the speed of the machine while at work is several time as fast as could be accomplished by a handrolling lawn mower, besides which it cuts more than twice as wide a path through the grass. It saves the beauof a perfect lawn rather than a hinkept in operation to keep the lawns at all times evenly cut, a problem that has in the past been no small one to the superintendent of the grounds.

#### Large Artificial Lake.

In a gorge of rock a little more than 200 feet wide the United States government has decided to construct a dam of solid masonry, the first under the Hanaborough-Newlands act, at the Tonto Basin site, that will create in the valleys of the upper Saut river and Tonto creek the largest artificial lake in the world. It will irrigate 200,000

#### STANDARD TIME.

Its Origin and the Arrangement of Its Dividing Lines.

Standard time is a system arranged by the railroads of the United States and Canada originally. The purpose was to do away with the multitude of different "times" used in business which affected the railways and in operating the lines. The territory in which these railroads lay was divided into belts running north and south and about 15 degrees wide, from east to west; in every such division of the country all railway business was to be done on the same time. In the maritime provinces of Canada and a part of Maine the time used was that of the sixtieth meridian west of Greenwich. There is no dotage to the Christian In the rest of New England and as far west as Pittsburg and Buffalo the time fixed was that of the seventy-fifth meridian, which is the time of Washington. The next belt westward was ninetieth meridian time, which is about the local time of New Orleans, and then comes mountain time, which is nearly that of Denver. Still farther west is Pacific time, which is that of the one hundred and twentieth merid-The corrupt church breeds public ian. Standard time divisions are not just 15 degrees from east to west nor are their boundaries regular. They are mapped out to suit the railroads, and the changes are usually fixed at points which are junctions for great railways or division terminals on the same lines. Sun time is supposed by most people to be the actual astronomical time of every place from day to day, but it is really an averaging or equalizing of exact local time, for the movements of the earth are too irregular to permit the convenient use of astronomical time, just as it is determined by the position of the heavenly bodies .- Detroit Free

The Glory of California Scenery. As long as there remains the love of beauty in the human soul so long will the glory of California scenery and that of the whole Pacific coast prove a source of inspiration to the poetic mind. Descriptive verse has been from the beginning a marked feature A sad world cannot be sweetened by of the literature of this region. In fact, the term "landscape poets" may be Individual righteousness will secure properly applied to this bevy of song birds which seemed to the late Maurice Thompson to have taken "complete possession of the entire western seaboard." Suffice it to say that if a vol-Patience and earnestness are pass- ume of verse were written by a Cali fornian which reflected nothing of the state's scenic beauty or its warmth of color it would not only come as a surprise to most reviewers, but the loyalty of the poet might be seriously questioned. While all this display of local Our duty to the present is paying color may seem too apparent an effort on the part of Californians to place up-The absence of sanity does not prove on their work the stamp of a definite locality, and may be considered by some a cheap form of art, it is this very sensitiveness to beauty and grandeur with which nature has clothed the west that offers the most promise of its rapid literary advancement-a sensitiveness, moreover, that will become more and more acute with the cultivation of the higher faculties through increasing educational growth.-Herbert

#### Loss of Appetite Is loss of vitality, vigor or tone, and is of-

ten a precursor of prostrating sickness. This is why it is serious, and most serious to people that must keep up and doing or get behindhand.

The best thing you can do for loss of appetite is to take

#### Hood's Sarsaparilla

to your food, and assist in its digestion. This great medicine cures all stomach troubles, and builds up the whole system

A Rocking Shrine. The most wonderful temple in the

world is built on a rocking stone on the summit of a mountain in northern India which is over 20,000 feet high. The rock weighs many thousands of tons, but is balanced on so fine a point that a comparatively light pressure is sufficient to make it sway. Hindoo priests teach their followers that this rock was placed in position by the help of the gods, and thus they add considerably to the feeling of awe which they desire to create.

Worshipers at this shrine must first make a perilous ascent of the mountain. Then they spend seven days of preparation in a temple built on the solid mountain before they are permitted to make the final passage to the tiful turf from destruction under the mysterious rocking stone. To reach feet of the horses, that were formerly this it is necessary to cross a bridge used on the large machines, for the over a great chasm, for nature and rollers are a help toward the making man have combined to make this Hindoo shrine difficult of access. After drance. It is a decided success and crossing the bridge the pilgrim mounts there are apt to be enough of them a ladder, to which he clings in terror for his life here and in the hereafter. The temple on the rock is necessarily small. Three priests officiate there, but its mysteries no man is permitted to reveal. Europeans have seen it only from a distance.

#### Making Allowances.

Bronson-I don't see why you should be so angry at your son for marrying. We have to make allowances for the young, you know.

Munson-Confound it, that's what I'm kicking about. I not only have to make an allowance for him, but now I'll have to make one for his wife too. -Kansas City Journal.

woman's troubles, tells of her cure by Lydía E. Pinkharn's Vegetable Compound.

"DEAR Mrs. PINKHAM: - For some years I suffered with backache, severe bearing-down pains, leucorrhoea, and falling of the womb. I tried many remedies, but nothing gave any positive relief.

"I commenced taking Lydia E. Pinkham's Vegetable Compound in June, 1901. When I had taken the first half bottle, I felt a vast imrovement, and have now taken ten bottles with the result that I feel like a new woman. When I commenced taking the Vegetable Compound I felt all worn out and was fast approaching complete nervous collapse. I weighed only 98 pounds. Now I weigh 109½ pounds and am improving every day. I gladly testify to the benefits received."—Mrs. R. C. Tupman, 423 West 30th St., Richmond, Va.

When a medicine has been successful in more than a million cases, is it justice to yourself to say, without trying it, "I do not believe it would help me"?

Surely you cannot wish to remain weak and sick and discouraged, exhausted with each day's work. You have some derangement of the feminine organism, and Lydia E. Pinkham's Vegetable Compound will help you just as surely as it has others.

Mrs. W. H. Pelham, Jr., 108 E. Baker St., Richmond, Va., says: "DEAR MRS. PINKHAM :- I must say that I do not believe there is any female medicine to compare with Lydia E. Pinkham's Vegetable Compound, and I return to you my heartfelt thanks for what your medicine has done for me. Before

taking the Vegetable Compound I was so badly off that I thought I could not live much longer. The little work I had to do was a burden to me. I suffered with irregular menstruation and leucorrhea, which caused an irritation of the parts. I looked like one who had consumption, but I do not look like that now, and I owe it all to your wonderful medicine. "I took only six bottles, but it has made me feel like a new person. I thank

God that there is such a female helper Be it, therefore, believed by all

women who are ill that Lydia E. Pinkham's Vegetable Compound is the medicine they should take. It has stood the test of time, and it has hundreds of thousands of cures to its credit. Women should consider it unwise to use any other medicine. Mrs. Pinkham, whose address is Lynn, Mass., will answer cheer-

fully and without cost all letters addressed to her by sick women. Perhaps she has just the knowledge that will help your casetry her to-day - it costs nothing.

\$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.

Lydia E. Pinkham Medicine Co., Lynn, Mass.

Sponge Growing.

Sponges are cultivated in West Indian waters and the Mediterranean. grind. In its natural state the bath or toilet sponge is fleshy and covered with a black skin. To obtain the light colored, horny and elastic skeleton, sponges are left in shallow sea water for several days in a staked inclosure until the rotten animal matter can be beaten out. For artificial cultivation a living sponge is cut into small blocks. about a cubic inch in size, with a portion of the outer skin on each. These, fixed to a frame of weighted trelliswork, are sunk into a few fathoms of clear water, where they flourish best on a bottom of green seaweed free from mud. In about seven years the cuttings grow into sponges of marketable size.

Their Chance.

Jaspar-Young Scadsby has enough Why doesn't he keep out of business and give others a chance?

Jumpuppe-But it is by going into business that rich young men like him give smart young men a chance to make money.-Life.

Fools and young people should beware of flattery-there is an axe to

"Both my wife and myself have been using CASCARETS and they are the best medicine we have ever had in the house. Last week my wife was frantic with headache for two days, she tried some of your CASCARETS, and they relieved the pain in her head almost immediately. We both recommend Cascarets." CHAS. STEDEFORD,
Pittsburg Safe & Deposit Co., Pittsburg, Ps.

... CURE CONSTIPATION.

## MANUFACTURERS

Who desire a location combining every feature conducive to prosperity, sufficiently near to San Francisco to enjoy all the privileges of a site in the metropolis, and yet sufficiently remote to escape the heavy taxation and other burdens incident to the city.

Where a ship canal enables vessels to discharge their cargoes on the various wharves already completed for their accommodation. Where large ferry boats enter the large terry slip now in use, and land passengers, freight and whole trains of cars.

Where an independent railroad system gives ample switching privileges to every industry.

Where a private water-works plant, with water mains extending throughout the entire manufacturing district, supplies an abundance of pure artesian water at rates far below city prices.

Where some of the largest industries in the State are today located and in full operation.

Where hundreds of thousands of dollars have already been spent in perfecting the locality for manufacturing purposes.

Where the South San Francisco Land and Improvement Company own THIRTY-FOUR HUNDRED acres of land and Seven Miles of Water Front on the San Francisco Bay, and on the main line of the Southern Pacific Railroad. Where, in fact, rail, wharf and other privileges are unexcelled for manufacturing purposes by any other locality on the coast.

If you desire such a location come and see what we have in South San Francisco, San Mateo County.

For further information call or address

## SOUTH SAN FRANCISCO LAND & IMPROVEMENT CO.

## TO HOME-SEEKERS

The South San Francisco Land and Improvement Company, comprising many San Francisco, Chicago and New York capitalists, created in San Mateo county a new town site known as South San Francisco. This town site is situated on the main line of the Southern Pacific Railroad, and also on the Southern Pacific Bay Shore Railroad, soon to be finished; it is also at the terminus of the San Francisco and San Mateo Electric Railway.

South San Francisco was platted as a town just prior to the great financial panic of 1893 and 1894; during all that period of financial wreck and ruin, when almost every new enterprise and many old-established institutions were actually swept out of existence, she has held her own and is to-day a prosperous community with a population of nearly FIFTEEN HUNDRED PEOPLE.

An extensive and fine residence district, where workingmen may secure land at reasonable prices, and on favorable terms, as homes for themselves and their families.

Upwards of \$2,000,000 in cash have been expended in laying the foundation of this new town. Most of the streets have been graded, curbed and sewered, miles of concrete sidewalk laid, trees planted along the main highways, and a water-works plant completed, giving an abundant supply of pure artesian water for every purpose. But the foundation laid in what is known as the manufacturing district of this town site constitutes above all others the most positive guarantee for

There is no stability nor permanency so absolute respecting real estate values, and the future growth of any community like that which is based upon industries giving employment to men. The facilities created by the founders of South San Francisco have already secured to her several large manufacturing enterprises, and will soon secure many more; this means not only an increase in population, but an enhancement in real estate values.

South San Francisco has passed the experimental stage, and is now an established town. Many of her lot owners who have properly improved their holdings are even to-day realizing from ten to twenty per cent net on their investments. How many communities as new as South San Francisco can make this boast? An independent community in itself, with its own supporting elements, and at the same time close to the metropolis of California, and in the direction in which

San Francisco must necessarily grow, already reached by some of the city's street car service, and certain to be on the line of any new railroad entering San Francisco, South San Francisco presents to-day opportunities for investment among the safest and best on the Pacific Coast. Detail information cheerfully furnished. Address
